

REQUEST FOR ACTION (RFA) FORM

GLAST LAT Project
ISOC Peer Review
March 2, 2004

Action Item # _____ 19 _____

Presentation Section/Subject Area: _____ Robustness of I&T Software for Ops Environment _____

SPECIFIC REQUEST:

Specify plans and requirements to ensure that software, particularly that “inherited” from I&T, will be of sufficient robustness for operations use.

REASON/COMMENT:

The ISOC team will reuse software from I&T. This software may not be of sufficient robustness for operations use without additional work. The ISOC may wish to look at the software “process manager” used for the XTE SOF which monitors operations software and restarts it if necessary, sends alerts if unfixable problems are found etc.
